

Senior Process Engineer (m/f/d)

"I want to achieve great things and I want them to be noticed"

NPTC Food, Singen, Germany

Undefined, act rate 100%

Are you ready to join a small but very multinational team in a challenging role? Within Nestlé's worldwide research and development network, the Nestlé Product Technology Centre FOOD with the central seat in Singen, Germany, is responsible for the innovation and renovation of culinary products. The NPTC Food Singen is the home of food and is bringing culinary art to a level that can be practiced at home or used in a professional kitchen. NPTC FOOD transforms science into technologies that deliver tasty and balanced meals with the highest freshness perception and convenience.

To support our Process Engineering Team, we are currently looking for a **Senior Process Engineer** to start as soon as possible.

Key responsibilities

As a Process Engineer at NPTC Food you will be responsible to drive process equipment innovations and support our factories around the world with technical assistance.

Hence, there are several interesting activities waiting for you:

- Design & develop processes and equipment concepts for **vegetarian meal solutions** with strong focus on optimal machine design, utilization, TCO and CAPEX efficiency under consideration of safety, quality and hygiene aspects.
- Leads **wet extrusion process** and other process equipment improvement and innovation activities in NPTC Food vegetarian meal solutions projects.
- Set strategy, coordinate and interact with key suppliers and internal customers on identifying the right machines for the right applications: from CAPEX evaluation, User Requirement Specification to machine manufacturing, FAT, commissioning, installation and start-up qualification.
- Deliver technical assistance to the markets on installation and start-up of new lines as well as on optimization of current lines.
- Lead competence development in the field of wet extrusion through training and/or mentoring. Develop a critical mass of specialists within the category.

Requirements:

- MSc or equivalent degree from a Technical University, preferably in Process, Packaging or Mechanics
- Expert knowledge in the area of responsibility: product, process, system and technology
- Profound experience in a factory environment is a pre-requisite
- Good understanding of TPM and Lean processes is an advantage
- Very good language skills (Fluent English is a must, good German skills would be a plus)

Further requirements:

- Supplier management experience
- Flexibility for business travels where necessary

NPTC Food wants to be a really good partner for you. With our offer for flexible working time and several work-life balance initiatives, we want to make sure that you can find a good balance between your professional and personal life. If you are also looking for an exciting, challenging and rewarding position in a great international atmosphere with other benefits like a company pension fund and individual offers for further development we would love to hear from you.
